Epic:	As a student or faculty member, I should be able to access, share, and manage educational resources (notes, assignments, past papers, lab manuals, etc.) from a centralized platform.									
Story 1:	As a user, I want to upload study materials and categorize them by subject, course, and semester.									
Story 2:	As a student, I want to search and download study materials easily.									
Story 3:	As a user, I should be able to register and create a verified profile.									
Task1:	Design User Registration Page and connect with backend database (MySQL, MongoDB, etc.).									
Task2:	Design login page layout.									
Task3:	Create the Resource Upload Interface with file support (PDF, DOCX, PPT, etc.) and metadata inputs.									
Task4:	Implement Resource Browsing & Download Interface with filters (course, semester, subject, type).									
Task5:	Design the EduShare Website Layout with user-friendly UI/UX.									
Task6:	Design a website									
ccceptance Criteri										
1	Registration layout includes validations for all input fields (name, email, phone, course, etc.).									
2	Login supports Email									
3	Users can upload, categorize, and manage study materials easily.									
4	Admins can view uploaded files, approve them, and monitor platform usage.									
	This is actual Development planning and tracking. Don't add documentation, survey, topic finalization, etc. activities.
